

5 Tools in the Fiber Optic Toolbox

Overview

Complete fiber optic tool kits with strippers, cleavers, cleaners, and testers in rugged cases. Help technicians install, test and maintain networks efficiently. In this article, we will explore five key tools that every fiber optics telecommunications technician should have at their disposal. These tools are specifically designed to allow a technician to manipulate optic fibers while not impacting the fiber in any. The tool consists of a plier with replaceable knife trays ranging over five different tube dimensions. The knife trays have two knives so that the tubes are split into two halves, which makes it simple to remove the tubes in a safe manner.
