

Armenia Lighting Distribution Box Configuration Table

AI Overview

Armenian XRM lighting distribution boxes are designed for AC 50/60Hz, three-phase four-wire systems, with rated voltage up to 400V and load current up to 100A, providing modular protection and control for industrial and commercial applications.

Overview

The XRM lighting distribution box is a lightweight, fully enclosed device used for secondary power distribution in industrial, mining, and building applications. It controls motors, lighting, and electrical equipment while providing protection against overload, short circuit, and leakage. The enclosure includes measuring instruments, control switches, buttons, and signal indicators for operational monitoring and safety.

Key Specifications

- System Type: AC 50Hz, 380/220V three-phase four-wire
- Rated Voltage: Up to 400V
- Rated Load Current: $\leq 100A$
- Applicable Circuits: Single-phase three-wire or three-phase five-wire systems
- Protection Features: Overload, short circuit, leakage protection
- Enclosure: Fully enclosed, robust, suitable for industrial environments
- Installation: Wall-mounted or modular terminal connection
