## Overview

BMH Trading Classic Motor Cycle parts Cable junction box, twin pull 1 cable to 2 [MA-P296/A] - Universal throttle cable stainless steel junction box (splitter) for one cable from twist grip to two cables for carbys, twin pull. The main function of a battery management system (BMS) is to monitor cell voltages, pack voltages and pack current. In addition, due to the high-voltage design of the BMS, insulation resistance measurement between the high-voltage domain and low-voltage domain is needed in order to catch defects in. A traditional battery junction box is a relay box or switch box with a power contactor that connects the entire battery pack to a load inverter, motor, or battery charger. Figure 1a shows a traditional BMS. With advanced, high-quality components, rugged durability and compact size, it's what you want to drive your next EV project.
