

CIF price SFP optical module QSFP

AI Overview

The CIF price of SFP optical modules varies widely, typically ranging from \$5–\$120 for 1G SFPs and \$50–\$300+ for 10G SFP+ modules, depending on brand, type, and reach.

Pricing Overview

1G SFP Modules:

- Generic or third-party compatible 1000BASE-SX/LX SFPs are usually priced between \$5 and \$25 per unit.
- OEM-branded modules from Cisco, HPE, or Juniper can cost \$60–\$120 or more, especially for industrial or extended temperature versions . 10G SFP+ Modules:

- Compatible 10G SR SFP+ modules often sell for \$50–\$100, while long-reach LR or ER modules from OEMs can reach \$200–\$300+ per unit . Factors Affecting CIF Price:

- Brand vs. third-party: OEM modules are significantly more expensive than compatible alternatives.
- Reach and wavelength: Short-reach (SR) modules are cheaper than long-reach (LR/ER) or ZR modules.
- Temperature and industrial specifications: Extended temperature or ruggedized modules increase cost.
- Volume and shipping: CIF pricing includes cost, insurance, and freight, so shipping distance, insurance, and import duties can affect the final price.
