

CMC busbar trunking and CFW busbar prices

AI Overview

CMC busbar prices start around US\$80 per meter, while general busbar trunking systems, including CFW types, range from \$8/m to over \$120/m depending on material, size, and customization.

CMC Busbar Pricing

CMC busbars, often made from high thermal conductivity copper alloys or aluminum, are used in circuit breakers, switchgear, and distribution panels . A typical CMC compact sandwich aluminum and copper busbar trunking system is priced at approximately US\$80 per meter . Prices vary based on:

- Material: Copper is more expensive than aluminum due to higher conductivity and durability .
- Rated current: Systems supporting 100–6300A will cost more for higher current ratings .
- Customization: More tap-off points, bends, or joints increase labor and material costs .
- Insulation and safety features: IP54-rated or insulated systems add to the price .
- Bulk orders: Purchasing larger quantities can reduce per-meter costs . CMC busbars also offer smart features like remote monitoring and predictive maintenance, which may slightly increase the cost but improve energy management and system efficiency .
