

Cable tray with opening

Overview

These trays ensure maximum airflow around the cables, promoting effective ventilation and heat dissipation to keep cable temperatures within safe limits. Additionally, their open design prevents moisture buildup. Cable trays are open support systems designed for carrying and organizing cables and wires. The terms cable tray, cable ladder, and cable trunking are often used interchangeably, though they differ slightly in design. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. Combining local manufacture and distribution with an extensive product range, these facilities ensure we. Constructed from high-quality welded steel wire, Cablofil® Wire Mesh Cable Tray is the result of decades of research and over 94,000 miles of installed tray across the globe. Depending on your delivery address, VAT may vary at Checkout. For other items, please see details.
