

Can I make a call if the splitter is plugged in incorrectly

Overview

The 'In Use Or No Line' message usually indicates line interference or signal conflict from the splitter. Check that the splitter is designed for simultaneous phone and fax use. If you have trouble connecting to the Internet after installing a splitter, double check that the RG is not plugged into the phone side of the splitter - as that will stop you from getting data. I'm certain I've connected the cables correctly. This establishes the. Often a modem that doesn't connect is improperly setup or a cable is loose or disconnected. This will allow them to share the line. Our cable box, for whatever reason the landlord has, has a Y-splitter that presumably accepts the ISP cable as input, and splits the.
