

How to modify a cable tray to a right-angle bend

Overview

Cut out a V-shape from the side wires, then bend the basket at the cut to form your angle. Reinforce with couplers or brackets if needed. What's the best way to support modified baskets?

Use compatible support arms, drop rods, or wall brackets, especially at junctions or. You can buy a manufactured 90 degree bend or make one on a cable tray bending machine but in this video I show you how to make one using a metal bar. Electrical UK Wiring == $\square\square$. The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. Construction of a flat 90° bend (A) The amount of tray lip to be removed is equal to 2, 3/4 the width of the tray, half of this measurement will be removed on either side of the centre line. The space between your lines will be determined by the tray size. For example, use 100mm gaps for 100mm.
