

Installation price of a one-in-two-out distribution box

AI Overview

The total installation cost for a one-in-two-out distribution box typically ranges from \$1,300 to \$1,800 for standard residential setups, including labor and materials.

Cost Breakdown

Unit Price: The price of the distribution box itself varies depending on material, capacity, and features. Basic residential boxes made of ABS plastic or standard steel can cost a few hundred dollars, while higher-quality or smart-enabled units may reach \$500–\$1,000 or more . **Installation Labor:** Professional installation is a significant portion of the total cost. For a standard residential upgrade, electricians typically charge between \$1,300 and \$1,800, which includes wiring, mounting, and testing . Complex installations, such as retrofitting older buildings or outdoor setups, may increase costs by 15–20% due to additional labor or conduit work . **Additional Factors:**

- **Material and durability:** Stainless steel or weatherproof enclosures cost more than basic plastic units .
- **Amperage and circuits:** Higher amperage panels or additional circuits increase both the box price and installation complexity .
- **Smart features:** Distribution boxes with monitoring, remote control, or energy management capabilities can double the upfront cost but offer long-term savings .
- **Permits and compliance:** Local electrical codes, permits, and certifications (UL, CE, or CCC) may add to the total cost .
