

Kenya Fiber Router Upgrade Version

Overview

Safaricom is replacing the routers in its customer's homes with the new Dual band Wi-Fi router that support 5 Gigahertz (GHz) frequency band. The upgrade is free of charge and they will send you a text weeks before they show up at your residence. Safaricom has introduced FTTR (fibre-to-the-room) home broadband in Kenya, expanding fibre connectivity beyond a single router setup to deliver wired-grade internet access across every room in a home. The rollout reflects growing demand for home networks that can support more connected devices and. Safaricom, Kenya's largest telecommunications provider has quietly executed a massive upgrade to its residential home fibre infrastructure, increasing bandwidth speeds by up to 167 percent without altering monthly tariffs. The fair usage limit is a consumption cap assigned for each usage cycle, not a volume resource or bundle allocation. Therefore, it is not. Weather-Resistant Design- Built to perform reliably in all conditions. Signal Amplification - Enhances signal strength to ensure stable and uninterrupted connectivity.
