

# Latest Prices for Cable Tray Sealing

## AI Overview

Cable tray sealing systems typically range from \$50 to \$300 per linear foot, depending on material, fire rating, and environmental protection requirements.

### Pricing Overview

The cost of a cable tray sealing system varies widely based on several factors:

- **Material and Construction:** Systems using high-grade polymers like EPDM, silicone, or polyurethane, or metal frames in stainless steel or aluminum, are more expensive due to durability and chemical resistance .
- **Fire and Smoke Ratings:** Firestop or intumescent seals that meet UL, CE, or IEC standards generally increase the price, as they provide critical safety compliance .
- **Ingress Protection:** IP-rated systems (e.g., IP66) designed to prevent dust, moisture, or gas ingress are costlier than basic sealing solutions .
- **Modularity and Flexibility:** Modular systems that allow easy expansion, retrofitting, or multi-cable penetration sealing tend to be priced higher due to engineering complexity .
- **Installation Complexity:** Systems that are easy to install with minimal labor (e.g., self-compression plugs or split-frame designs) may reduce total cost despite higher unit prices .

### Typical Price Ranges

- **Basic Sealing Plugs or Sleeves:** \$50-\$100 per linear foot, suitable for low-risk environments or single-cable penetrations .

Sheets  
WSP weatherstops are designed to seal penetrations of any type in walls or floors by cable tray, cable conduit, pipe and/or bus duct. The WSP system utilizes a powder coated or galvanized steel frame that encompasses the entire tray or duct at the point of penetration. These steel frames are chemical, water and corrosion resistant and are suitable for use in most environments.
