

Papua New Guinea Fiber Optic Network Connector Factory

AI Overview

Papua New Guinea currently relies on local suppliers and international manufacturers for fiber optic fast connectors, with no dedicated connector factory reported within the country.

Local Fiber Optic Suppliers

In Papua New Guinea, companies like Cetelnet and East Coast NetLink provide a wide range of fiber optic products, including cables, patch cords, pigtailed connectors, and installation accessories. Cetelnet, based in Port Moresby, supplies single-mode and multi-mode fiber cables, splice enclosures, distribution boxes, and pre-terminated patch cords with various connector types (LC, SC, ST), supporting both enterprise and telecom networks. East Coast NetLink offers high-speed fiber connectivity and customized solutions for businesses, government agencies, and remote areas, often integrating satellite backup for redundancy.

National Fiber Infrastructure

The backbone of PNG's fiber optic network is managed by PNG DataCo, a state-owned entity operating the National Transmission Network (NTN). DataCo manages over 7,000 km of terrestrial and submarine fiber optic cables, including multiple international Points of Presence (PoPs) and Internet Gateway Nodes. This infrastructure supports broadband, point-to-point data, voice, and video services across 20 provinces, enabling connectivity for both urban and rural areas.
