

Pigtail fiber model st

Overview

Professional Single Mode ST Pigtail: 12 fiber, 3M length, with pre-terminated fiber and protective jacket. Ideal for reliable connections and fast installations. We stock a wide variety of pigtail fiber types, including single mode and multimode, with all major connector options like SC, LC, ST, and FC available with UPC or APC polish. Each strand is terminated on one end and the other end is left blunt so that it can be spliced to your drop cable. Our fiber pigtails come with a partial outer jacket to help protect the tight buffer fibers. Leviton fiber optic pigtail kits are a good solution for mechanical or fusion splicing applications.
