

Price of Fixed Outdoor Server Racks

AI Overview

Outdoor server racks typically range from \$500 to \$3,500 or more, depending on size, IP rating, and additional features.

Price Ranges and Factors

- **Small Outdoor Racks (6U-12U, IP55):** These compact racks suitable for edge computing or small network installations generally cost \$500-\$1,200. They provide basic weatherproofing, ventilation, and lockable doors .
- **Medium Racks (18U-24U, IP55-IP65):** For larger deployments, including telecom or municipal infrastructure, prices typically range from \$1,200-\$2,500. These often include built-in fans, thermostats, and reinforced construction for outdoor durability .
- **Large or Custom Racks (30U-42U, IP65-IP66):** High-end or bespoke outdoor cabinets designed for extreme environments, high-salinity areas, or flood-prone zones can cost \$2,500-\$3,500+, especially if they include stainless steel hardware, UV-stabilized gaskets, and advanced climate control .

Key Features Affecting Cost

- **IP Rating:** Higher ingress protection (IP65 or IP66) increases cost due to better sealing against dust, water, and UV exposure .
- **Size and Height (U):** Taller racks with deeper mounting profiles require more material and structural reinforcement, raising the price .
- **Cooling and Ventilation:** Built-in fans, thermostats, and filtered ventilation systems add to the cost but are essential for maintaining equipment reliability .
