

Swedish Temporary Distribution Box Installation Company

AI Overview

Several Swedish companies provide temporary distribution box installation services, including Ahlsell, J&HW Group, and Wieland Electric, offering solutions for construction, industrial, and event applications.

Key Providers

Ahlsell offers a wide range of temporary distribution boxes suitable for construction sites and renovation projects. Their products include wall-mounted and portable panels with multiple Schuko and CEE outlets, miniature circuit breakers, and earth fault protection. The boxes are designed for Nordic outdoor conditions, with impact-resistant housings, IP44 protection, and ergonomic features for easy service and maintenance. J&HW Group specializes in temporary distribution solutions for industrial and construction settings. Their distribution boxes handle power demands from 10 kW to 200 kW, equipped with Residual Current Devices (RCDs), overload protection, and high-impact-resistant housings. These units are suitable for harsh outdoor environments and high-voltage European industrial standards, ensuring safety and reliability for heavy-duty equipment. Wieland Electric provides mobile and pluggable temporary distribution boxes for exhibitions, events, and light construction work. Their WIV series offers quick assembly, flexible extension, and safe operation with harmonized residual current and miniature circuit breakers. The boxes comply with IEC 61439 and IEC 61535 standards, and can be customized with multifunction meters for energy monitoring. Wieland also supports decentralized installation for smart buildings and industrial applications.
