

Tools used for installing distribution boxes

AI Overview

Installing a distribution box requires a combination of hand tools, power tools, safety equipment, and materials to ensure a safe and efficient setup.

Hand Tools

- Screwdrivers: Both flathead and Phillips types are essential for securing screws on the box and cover .
- Pliers: Lineman's pliers for holding and twisting wires, and needle-nose pliers for reaching tight spaces .
- Wire Strippers: To remove insulation from wires before connecting them .
- Measuring Tape and Utility Knife: For accurate placement and cutting of wires .
- Wrenches: A 9/16-inch wrench is commonly needed for hardware installation .

Power Tools

- Drills and Impact Drivers: Used for mounting the box and securing screws quickly .
- Hole Saws: For creating openings in walls or panels for cable entry .
- Banding Tools: Include stainless steel banding, buckles, tensioning tools, and metal shears for mounting the box securely .

Safety Equipment

- Insulated Gloves and Safety Glasses: Protect against electrical hazards and debris .
