

Zimbabwe s High-Efficiency UPS System 100kWh

AI Overview

The RM Series Modular UPS in Zimbabwe delivers 100kW modules with 97.5% efficiency, N+X redundancy, and scalable modular architecture for critical power applications.

Key Features

- **Power Capacity:** Each module provides 100kW, with a single cabinet capable of 1.2MW, and the system can scale up to 3.2MW using a 4-unit parallel configuration .
- **Efficiency:** Achieves 97.5% double-conversion efficiency and up to 99% in Super ECO mode, significantly reducing energy consumption while maintaining clean, reliable power .
- **Redundancy:** Supports N+X redundancy, ensuring high availability for critical infrastructure and minimizing downtime .
- **Technology:** Utilizes Type-I 3-Level inverter technology with active PFC input control, providing stable voltage and frequency output for sensitive equipment .
- **Footprint:** Compact design with a 1.32m² cabinet, offering high power density suitable for data centers and industrial applications .
- **Modularity:** Fully modular architecture allows seamless expansion, enabling organizations to add capacity as demand grows without major system overhauls .

Applications

The RM Series UPS is ideal for:
